

Plan of approach week 3

Assignment 3: Create a Blog

rkolen

29 January 2018

1 Assignment details:

Assignment details:

- Use Trello to create a backlog compiled of the user stories divided in 3 columns: Not started, In progress, Done.
- Create a tasklist to have a clear plan on how to approach the project.
- The code should be pushed to Github. During the week commit multiple commits when a step is completed and add in the message which story it entails (example. [w3-001]).
- The idea is to use a database.
- Have a working solution on a public server.
- No MVC-frameworks can be used, such as Symphony, Laravel.

2 Approach:

- Use Trello to divide the tasks given for the assignment and divided it in smaller tasks(where needed).
 - Start with the priority tasks.
- ie. make the Blogger able to create posts[W3-001] and the Reader to read posts[W3-002]. (Tier 1).
- Create a login screen for the Blogger[w3-003].
 - Make it possible for the Blogger to add categories[w3-004].
 - Create a sorting function for the Reader [w3-005].
 - Make it possible for the Blogger to add categories[w3-006].
 - Have the Blogger be able to add multiple categories to 1 post[w3-007].
 - Make it possible to the Blogger to format his posts[w3-008].
- ie. bold, cursive etc.
- Add the possibility to add pictures [w3-009].
